DETAILED ACTION

This Office action is responsive to communication received 03/12/2004 – application papers filed.

This application is a CIP of 10/428,061, filed 05/01/2003, which is a CIP of 09/551,771, filed 04/18/2000, now U.S. Patent No. 6,605,007.

Claims 1-26 are pending.

Drawings

A cursory review of this application reveals that Figures 12g, 12h, 12i, 12j are missing from this application.

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

- Species I: Figures 1-5;
- Species II: Figure 8;
- Species III: Figure 9;
- Species IV: Figures 11-12b;
- Species V: Figures 12c-12d;
- Species VI: Figures 12e, 12f;
- Species VII: Figure 12g;
- Species VIII: Figure 12h;
- Species IX: Figures 12i, 12j;
- Species X: Figures 14a, 14b.

The species are independent or distinct because there is no disclosure of a relationship among the species. There would appear to be a patentable difference among the species claimed. Further, there would be a serious burden to search the claimed invention if restriction is not required.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 3711

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
